BISMARCK AIRPORT HITS NEW PASSENGER BOARDING MILESTONE IN JUNE!

(Bismarck, ND)- The passenger boarding numbers are in for the month of June and the results are phenomenal! Not only did June 2012 total enplanements increase 31.6% over June 2011, but never before has the Airport boarded as many passengers in a single month.

Airport staff reports passenger enplanements in June 2012 were 21,140 passengers compared to 16,055 in June of 2011. "This is remarkable news," said Airport Manager Greg Haug, "The airlines are experiencing firsthand what Airport staff routinely tells them; the economy is booming and people want and need to travel more."

Haug continued on to say, "The addition of Frontier Airlines into our market has helped tremendously in terms of seat capacity, but based upon the record breaking numbers, the community still needs additional seats. We continue to work with our airline partners to address this demand."
